

DEC 20 1984

REF: 8AW-WM

Ms. Marla A. Noack
Hazardous Waste Section
Kansas Department of Health and
Environment
Forbes Field
Topeka, Kansas 66620

Dear Ms. Noack:

This letter responds to your December 7, 1984, request for information concerning the compliance history of the Ashland Chemical Company facilities. Two Ashland Chemical facilities in Region VIII have notified us that they handle hazardous waste: one near Denver and one in Salt Lake City.

Our hazardous waste compliance files show that we have only issued one enforcement action against the facility in Sheridan, Colorado, which is north of Denver. This enforcement action was a Warning Letter noting that they had stored hazardous waste on-site for ~~fifteen~~¹⁵ days, which is in excess of the 10-day storage limit for transporters. This facility is also considered a generator site, but we have noted no violations with reference to the generator requirements.

The other Ashland Chemical facility is located in Salt Lake City. Since the Utah Division of Health has had authorization for the hazardous waste program since 1980, we suggest you contact them directly with your inquiry at:

Bureau of Solid Waste Management
Utah Division of Health
State Capitol Office Building
P.O. Box 2500
Salt Lake City, Utah 84110
Attn: Kent Grey, Supervisor

We hope this responds adequately to your request. If you have any question or comments, please contact Ms. Diana Shannon, of my staff, at (303) 844-4261.

Sincerely yours,

for JW
